

VIGNESH R

Software Engineer

Cuddalore, Tamil Nadu | 8778919006 | vickyvijay1500@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in Java development, build automation, and CI/CD pipeline support within an SLA-driven, telecom production environment at Capgemini. Skilled in debugging, root-cause analysis, and version control (Git), with practical exposure to containerized application development using Docker, Kubernetes, and Maven-based builds. Self-driven learner who has built and deployed full-stack personal projects end-to-end, with strong collaboration skills across cross-functional development and technology teams.

TECHNICAL SKILLS

Programming & Build Tools: Java, Maven, HTML, CSS, JavaScript, Shell Scripting, Object-Oriented Programming

Version Control & CI/CD: Git, GitHub, CI/CD Pipelines, Release & Configuration Management, SDLC

Containers & Orchestration: Docker, Kubernetes, Minikube

Systems & Debugging: Linux, Grafana, Debugging, Root Cause Analysis, Cross-Functional Collaboration

WORK EXPERIENCE

Software Engineer — Capgemini

Oct 2025 – Present

- Debugged and resolved CI/CD pipeline and software delivery issues on a Nokia telecom project, performing root-cause analysis and implementing fixes to meet SLA targets in a 24/7 production environment.
- Monitored data flows and release/configuration ticket queues, collaborating with cross-functional development and technology teams to resolve NetAct software delivery issues within SLA.
- Supported migration of manual release and configuration workflows into standardized, Git-based CI/CD processes, reducing manual errors and improving software delivery repeatability.
- Developed automation and version-control scripts using Java, Git, and Linux shell scripting to streamline the software development and release lifecycle.

PROJECTS

Movie Recommendation Web App — Kubernetes Deployment (Minikube)

2025

- Containerized a movie recommendation web application with Docker and deployed it to a local Kubernetes cluster using Minikube, without relying on an external container registry.
- Diagnosed and resolved image-pull errors and service naming mismatches through systematic root-cause troubleshooting of the container networking stack.
- Applied core Kubernetes concepts (Pods, Services, Deployments) hands-on as part of a self-driven initiative to build production-style container orchestration skills.

Personal Portfolio Website

2025

- Built and deployed a fully responsive personal portfolio website using HTML, CSS, and JavaScript to showcase projects, skills, and technical background.
- Implemented responsive layouts and interactive UI elements to ensure consistent functionality and design across desktop and mobile devices.

CERTIFICATIONS

- Oracle Generative AI Certification
- KCNA — Kubernetes and Cloud Native Associate Certification (Udemy)

EDUCATION

B.Tech, Artificial Intelligence and Data Science

VSB Engineering College — 2025
